BUILDING OPERATIONS

SOUTH AUSTRALIA

MARCH QUARTER 1968

SCOPE

This bulletin gives information about "new building" operations in South Australia; in addition to a summary for the period 1963 to March 1968 it shows details concerning houses and flats, other buildings, employment in the industry, and dwellings in local government areas. The information has been compiled from returns collected from all builders of new buildings.

DEFINITIONS

New Building: Alterations and additions of \$10,000 and over to existing buildings are included, but minor additions, alterations, repairs and renovations, and all construction activity such as railways, bridges, earthworks, water storage, etc., are excluded.

Value: All values shown exclude the value of land and, except in Table 4, represent the value of buildings upon completion (see also "Completion"). Values shown in Table 4 represent the amount of work done on new buildings during the period and are not subject to the fluctuations from period to period noted in Table 3 in the values of "new buildings other than dwellings"; these fluctuations are partly the result of the unequal incidence of individual large contracts.

Commencement: A building is recorded as commenced when work on the foundation has begun.

Under Construction: Once commenced, even though work on it may have been temporarily suspended, a building is classified as "under construction" until its "completion".

Completion: A building is regarded as having been completed when the contractor has fulfilled the terms of the contract or in the case of an owner-built house when the dwelling is either completed or occupied (whichever occurs first). However, the value in all cases is that of the building as a finished project as planned.

COMMENTS

1,655 houses were commenced and 1,531 were completed during the three months ended March 1968. Commencements were 8 less than in the December quarter 1967 and 36 less than in the March quarter 1967. Completions were 642 less than in the previous quarter and 410 less than in the March quarter 1967.

The total of 2,056 dwellings (houses and flats combined) commenced was 58 more than in the preceding quarter and 84 more than in the March quarter 1967.

There were 11,768 persons recorded as employed on building jobs at 29 March 1968. This was 435 less than on 13 December 1967 and 664 less than on 31 March 1967.

Note: Building employment covers all contractors and sub-contractors and employees of contractors, sub-contractors, and government instrumentalities, who on the day specified were actually engaged on the construction, alteration, repair, and maintenance of buildings, but excludes persons working on owner-built houses or for contractors or sub-contractors who undertake only alterations, additions, repairs, and maintenance. Persons "actually engaged" include those temporarily laid off because of weather. Some duplication may occur as a result of frequent movement between jobs or because some persons (such as electricians) may work on several jobs which are under construction simultaneously.
